

Well does this mean that the NAB is going to stop the weather channel, news channels and sports channels on cable TV, satellite TV. If people did not want these channels on XM they would not give a thumbs up on it. Personally I would like to see more cities on for local traffic and weather. If the NAB gets there way, they will put XM out of business. KEEP FIGHTING XM, I know a lot of truck drivers like myself will support you. XM is the best thing since sliced bread.
